

INSTALLATION INSTRUCTIONS

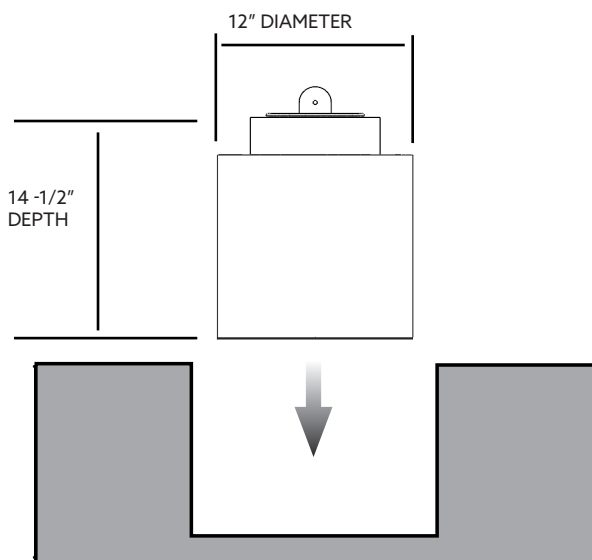

STAINLESS STEEL FLUSH MOUNT WITH CONCRETE CYLINDER

Step 1.

Determine the location of the base.

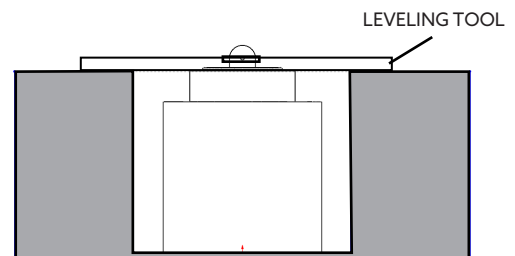

Step 2.

Dig a hole big enough to fit the concrete cylinder.
(See cylinder dimensions below)

Step 3.

Insert concrete cylinder and level with floor/pavers.

Step 4.

Fill any voids with sand or earth material that was previously removed.

Pack material until base is tight in place.
